

Contents

FELLNER, D.	1 - 12
Hydrogeological aspects for the design of deep seated tunnels	
BONNARD C., TACHER, L.	13 - 22
Hydrogeological and geomechanical modelling of a large slide in Flysch to test the efficiency of an underground drainage scheme and the induced water pressure field changes	
JOHN, M., POSCHER, G.	23 - 38
Primärspannungsmessungen: Zurecht oder zu Unrecht ein Stiefkind der Felsmechanik	
LENHARDT, W.	39 - 45
Dynamical induced deformations in the alps	
KONIETZKY, H., RUMMEL, F.	46 - 54
In-situ stress field measurements and stress field modelling	
GORITZKI, A., HARER, G.	55 - 65
Spannungsmessung für das Projekt Koralmtunnel Methoden, Ergebnisse, Diskussion	
BAUMANN, H.-J.	66 - 78
Scherfestigkeiten aus Rückrechnungen und Laborversuchen (ein Vergleich an Hand von Fallbeispielen)	
HAGEDORN, H.	79 - 87
Gotthard Base Tunnel: Numerical and analytical modeling for the support Design of a cavern	
BLÜMLING, P., KONIETZKY, H.	88 - 95
Calibration and verification of a constitutive law for Opalinus Clay – results From laboratory and in-situ tests	
PRAT, P.C., LEDESMA, A.	96 - 104
Numerical analysis of slope failure: expectations vs reality	
PREH, A.	105 - 116
The use of the Particle Flow Code (PFC) to analyze buckling of rock slopes	
KITZLER, C., WALTER, H.	117 - 128
Geotechnical measurements in swelling rock – instrumentation of exploratory headings, results, conclusions	
GRUNICKE, U.H., WALTER, H.	129 - 142
Design of Tunnel Linings in Swelling Rock	
ZETTLER, A.H.	143 - 151
Contribution of tunnelling in swelling rock
